Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement has been received and considered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Duckett '663..

Regarding claim 1 Duckett discloses a device similar to applicants. Note the equalization space provided by the envelope at 18.

Lacking is the connecting element provided in the rod guide 4.

However note the fill hole at 29 and the gas inlet, or connecting element, at 31.

One having ordinary skill in the art at the time of the invention would have found it obvious to have modified the device of Duckett so that a connecting element could be provided in the rod guide 4 to connect the envelope 18 to a flow connection, as such a modification would amount to an obvious alternative connection arrangement to that of Duckett dependent upon the particular vehicle undercarriage or desired suspension arrangement.

Art Unit: 3683

4. Claims 2-8 rejected under 35 U.S.C. 103(a) as being unpatentable over Duckett in view of Gladieux.

Regarding claim 2 Duckett lacks a showing of the particular structure of the connecting element and snap ring.

However such couplings are notoriously well known in the art for easy assembly and removal.

The reference to Gladieux is relied upon to show one such well known coupling arrangement. Please see figures 2-6.

To have provided such a coupling in the device of Duckett would merely amount to an alternative equivalent type of coupling to connecting element shown by Duckett, but as modified above.

The limitations of claims 2-5,8 are considered to merely be an alternative arrangement to that of Duckett, as modified by Gladieux.

Regarding claim 6 to have provided a bushing, as claimed, in the device of Duckett as modified by Gladieux would have been obvious dependent upon the particular type of coupling arrangement selected. Note the support surface (not labeled) for the ring 40 in Gladieux on the coupling, considered to function the same as applicant's bushing.

Regarding claim 7 note the seal at 70 in Gladieux.

Art Unit: 3683

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see the other types of coupling arrangements shown in the prior art of record. Please see the bushing in Cunningham at 33.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Schwartz whose telephone number is 703-308-0576. The examiner can normally be reached on M-F 9:30-6:00.
